

BioStability News

Precision Stability Storage Quarterly Newsletter

Precision Stability Storage provides validated environmental storage solutions. We specialize in maintaining precisely controlled temperature and humidity environments, ensuring full compliance, material and product integrity, and long-term reliability.

MATERIALS STORED

- Accelerated Stability Storage
- Archival Samples
- Biopharmaceuticals
- Clinical Material
- Cosmetics
- Long and Intermediate Stability Storage
- Medical Devices
- Nutraceutical
- Research Material

LOCATIONS

- California
- Florida
- Massachusetts
- North Carolina

Business Continuity Begins Before the Crisis

Having a secondary site for archival or research materials, as well as biopharmaceutical or medical device products, is a crucial component of any business continuity plan.

When unexpected events — such as natural disasters, power outages, or equipment failures occur, operations can be disrupted and valuable materials put at risk.

A secure, off-site facility with redundancies provides assurance that critical materials and data remain protected, monitored, and accessible, regardless of what happens at the primary site.

CUSTOMER BENEFITS:

- Reduces risk of **sample loss** from disasters, outages, or equipment failure
- Ensures **continuity of research and operations** during emergencies
- Provides **redundancy** to meet regulatory and quality compliance standards
- Offers **secure, temperature-controlled storage** for long-term preservation
- **Flexible access and storage options**
- Strengthens institutional resilience and **disaster recovery preparedness**

FACT Accreditation: Raising the Standard for Cellular Storage

We're proud to announce that Precision Stability Storage (PSS) has successfully completed its second Foundation for the Accreditation of Cellular Therapy (FACT) audit of our California facility and has now received formal FACT Accreditation under our cellular therapy clients.

This accreditation highlights our ongoing commitment to quality and compliance with the highest industry standards. For our customers, this achievement provides added confidence that their cellular therapy materials are stored, monitored, and managed with precision and care in a quality-driven environment.

Our cGMP and ICH stability storage facilities maintain precise temperature and humidity environments to ensure product integrity and regulatory compliance.

NEW HIRE SPOTLIGHT

NAME: ALEX SOLORZANO
JOB TITLE: FACILITY TECHNICIAN

What's your role at Precision Stability Storage?

My role includes managing biological materials, shipping, receiving, monitoring freezers and liquid nitrogen storage, and overseeing inventory.

What's your background in the life sciences industry?

I earned my bachelor's degree in molecular biology from Cal State Long Beach and have a strong interest in medical research. I have a background in biotechnology, with experience in genetic sequencing, developing diagnostic technologies, and data analysis.

What do you like to do outside of work?

In my free time, I enjoy playing soccer and volleyball, as well as spending time outdoors hiking and camping.
